Professional Summary

8+ years of software engineering experience, combining a strong foundation in C#/.NET and Azure with 2 years of specialized expertise in Generative AI and Agentic Systems. Proven track record of leveraging deep backend knowledge to architect scalable RAG pipelines and autonomous agents using LangChain, Pinecone Vector Database, Microsoft Copilot Studio, and Azure AI Foundry. Expert in bridging the gap between traditional enterprise architecture and next-generation AI, delivering high-value solutions.

Technical Skills

Python • Generative AI • LLMs • LangChain • LangGraph • NLP • MLOps • Scikit-learn • Pandas • Numpy • Azure AI Foundry • Azure AI Search • Azure Functions • Azure Cosmos DB • Dot Net core • Fast API • GIT • GIT

Work Experience

Coforge Ltd | Oct 2021 – Current
Helm Analytics Pvt. Ltd. | Jan 2020 – Sep 2021
Chetu India Pvt. Ltd. | Feb 2019 – Jan 2020
Wildnet Technologies Pvt. Ltd. | Jan 2017 – Feb 2019

GenAI Projects

Insurance GPT – Enterprise AI Document Intelligence Platform

- Designed and developed a secure enterprise-grade AI assistant for insurance workflows, enabling intelligent document querying and AI-powered conversational support.
- Built a document-based RAG pipeline with OCR ingestion, embedding generation, semantic retrieval, and real-time web search integration using Tavily Search API and PostgreSQL pgVector for context-aware responses.
- Integrated Azure AI Foundry Guardrails and Safety Controls with local/self-hosted LLMs to enforce responsible AI policies, content filtering, prompt protection, and secure

AI interactions.
• Implemented Microsoft Entra ID (SSO), PII redaction layer, and compliance workflows to ensure secure and privacy-safe LLM interactions.
• Implemented multi-LLM support using LiteLLM with OpenAI, AWS Bedrock, and self-hosted models, enabling scalable and flexible AI model orchestration.
• Developed backend services using Python and FastAPI, with containerized deployment on AWS ECS and observability using LangFuse.
• Supported ingestion and processing of PDFs, Word, Excel, and image-based documents with automated OCR fallback mechanisms.

AI-Driven Weather Hazard Intelligence Platform

- Built a RAG-based GenAI system to predict location-specific weather hazards and enrich insurance FNOL and claims workflows.
- Developed LangChain agents with custom tools for weather data, policy context, and claims enrichment, orchestrated using LangGraph for stateful multi-step workflows.
- Integrated Azure OpenAI, Azure Functions, Blob Storage, and Cognitive Search (Vector Search) for scalable, serverless GenAI deployment.
- Enabled context-aware conversations, proactive alerts, and risk-based add-on recommendations with secure access using Azure AD and Managed Identity.

AI Insurance Assistant with LangChain Agents

- Developed an intelligent insurance assistant using LangChain agents and custom tools for policy queries, claim status lookup, and document tracking.
- Automated multi-step workflows, integrating database queries, email generation, and compliance checks to streamline insurance operations.
- Enabled context-aware, multi-turn conversations with memory retention to handle complex insurance scenarios.

Backend .NET Experience

- Spearheaded full-stack development across Legal, E-commerce, and Healthcare domains, designing scalable architectures using ASP.NET Core, MVC, and Angular.
- Implemented robust cloud-native solutions on Microsoft Azure, utilizing Azure App Services, Azure Functions, and Azure Active Directory to ensure secure and scalable application deployment.
- Developed and consumed RESTful WebAPIs to support mobile and web clients, while integrating real-time communication features using SignalR (WebSockets) for live tracking and correspondence systems.
- Conducted in-depth project analysis and requirement gathering, creating technical specifications and high-level designs for compliance-driven e-commerce and inventory management platforms.

- Optimized front-end interactions using JavaScript and jQuery within Visual Studio environments, delivering responsive solutions for Web applications.

Certifications

- Microsoft Certified: Azure Developer Associate (AZ-204)
- Microsoft Certified: Azure Fundamentals (AZ-900)
